

COBALT®

Mass Notification

Make sure that all your employees or customers are safe when any incident happens

Allow your staff to send notifications and follow sent notification status. Cobalt Mass Notifications is the smarter way for your organization to send messages quickly to all stakeholders and employees when events occur.

Instant messaging to all your people

Using the Cobalt Mobile application, you can easily inform your employees and clients of any incident. All stakeholders are automatically notified while your incident management team get updated status of the ones that have received the information. Cobalt also enables you to save notification templates for faster messaging, which are accessible by any allowed users, even on their phone.

- Create and send message notifications from mobile app and web
- SMS, Text-to-voice, Email & Push Notification
- Access delivery status, acknowledgment and SMS answers from mobile app and web
- Save notification templates for faster messaging when incidents occur

Integrated

Our platform leverages Motorola Solutions and Everbridge' notification system to ensure the best and fastest communication with your employees when incidents occur.
